

### REMARKS

In view of the above amendments and the following remarks, reconsideration of the objections contained in the Office Action of March 22, 2005 is respectfully requested.

The Examiner objected to the specification because the Examiner asserted the title of the invention was not sufficiently descriptive. In view of the Examiner's objection, the title of the invention has now been amended as indicated above to a new title that clearly indicates the subject matter of the invention to which the claims are directed. In view of the new title, it is respectfully submitted that the Examiner's objection to the title has been overcome.

The Examiner indicated the present application is in condition for allowance except for the formal matter discussed above regarding the new title. Therefore, in view of the above-discussed new title and remarks, it is respectfully submitted that the present application is now in condition for allowance. However, if the Examiner should have any comments or suggestions to help speed the prosecution of this application, the Examiner is requested to contact the Applicant's undersigned representative.

Respectfully submitted,

Masanobu NOGOME et al.
